QUALITY, ENVIRONMENT AND OCCUPATIONAL HEALTH & SAFETY POLICY

ANANTA SOLUCIONES INDUSTRIALES provides industrial maintenance engineering solutions for the design, manufacture and implementation of industrial processes, as well as the sale of machinery and spare parts.

The organisation has decided to implement an Integrated Management System for Quality, the Environment and Occupational Health and Safety, in accordance with the requirements of the **ISO 9001, ISO 14001 and ISO 45001** standards respectively.

The Management of **ANANTA** approaches the Integrated System as the way of organising the company's operations on the basis of a set of core pillars: the quality of its products and customer satisfaction, the management of environmental aspects, emergencies, risks and legal requirements, occupational health and safety, and the continual improvement of the system's effectiveness.

To this end, the Integrated Management System of ANANTA is based on:

- Quality, care for the environment and occupational health and safety, as well as their improvement, are the responsibility of all members of **ANANTA**, starting with the Company's Management.
- The development of the integrated system is achieved by planning, implementing, reviewing and improving the Integrated Management System, taking into account at all times the context of the organisation, both internal and external, and especially its interested parties, as well as the applicable legal and regulatory requirements and the internal requirements established by our organisation.
- Quality is focused on the satisfaction of all our customers and interested parties, through the commitment of the entire organisation to meet their needs and requirements, as well as the legal and regulatory requirements and those of the products themselves.
- The organisation is committed to environmental protection, to identifying environmental aspects and controlling their impacts, mainly in the prevention of pollution and in the proper and sustainable use of resources. Likewise, it promotes the efficient use of available natural resources and intensifies the continual improvement of environmental management in order to achieve improvements in the overall performance of the company, with a life-cycle perspective.
- The integrated system is supported, throughout the organisation, by continual improvement of both the production and service delivery processes and their effectiveness, in which preventing errors and risks is a fundamental aspect.
- The integrated system leads us to pay the utmost attention to technological developments and to the improvements that new technologies may make available to us, in order to optimise our processes to the fullest.
- **ANANTA** is committed to the personal and professional development of all members of its organisation, which translates into a constant study of their needs and the provision of the necessary resources for staff training and awareness, as well as the delivery of timely training actions in the areas of quality, environment and safety.
- This Policy provides a framework for setting quality, environmental and occupational health and safety objectives, and for establishing and regularly reviewing these objectives and targets in line with the commitments undertaken herein.
- It includes the commitment to provide safe and healthy working conditions for the prevention of work-related injury and ill health, appropriate to the purpose, size and context of the organisation and to the specific nature of its OH&S risks and opportunities.
- Likewise, it includes the commitment to eliminate hazards and reduce occupational health and safety risks.
- Maintaining the integrated system requires the participation and collaboration of everyone; this Policy is therefore communicated to all **ANANTA** personnel for their knowledge and understanding.
- This Policy is periodically reviewed by Management to ensure that it remains appropriate to the purpose, context and strategic direction of the organisation.

It should be noted that **ANANTA SOLUCIONES INDUSTRIALES** declares its commitment to establishing and developing policies that integrate equal opportunities, without discrimination on the grounds of sex, and to promoting this equality as a strategic principle of its corporate and human resources policy, in order to achieve effective equality between women and men.

For the effective application of these principles, the support of both the management team and the workforce is absolutely essential.

Toledo, 31 March 2026

José Antonio Bobo
General Manager
